#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

Water rights in California. They are riparian and appropriative rights.

Land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in  
direct contact with the source and must never have been severed from the sources of supply by an intervening parcel without  
a severed parcel. Generally, a riparian water user must share the water supply with other riparian users.  
the natural flow of a stream but may not be used to store water for later use or divert water which originates in  
the stream system, return flows from use of groundwater, or other "foreign" water to the natural stream

Use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised  
only by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license  
to be granted to waters "foreign" to the natural stream system.

Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100  
of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone  
diverts water from their diversions, and (3) assists the State to determine if additional water is available for future

For general information. For more specific information concerning water rights, please contact an attorney or  
pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to  
Appropriation of Water in California.

Energy conservation is real. Every California needs to take immediate action to reduce energy consumption.  
You can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Division and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
